

ASSIGNMENT

01 - Flow of Program

1. Input a year and find whether it is leap year or not

pseudocode :-

start

input year

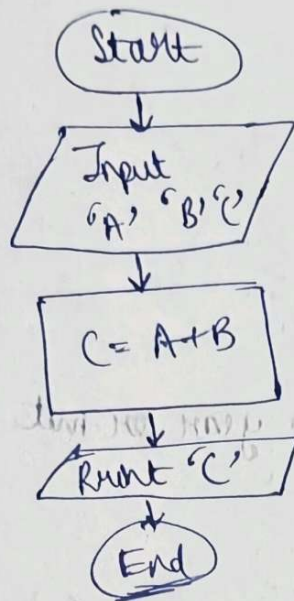

if $(\text{year} \% 400 == 0)$ or $(\text{year} \% 4 == 0 \ \& \ \text{year} \% 100 != 0)$:

print ("Leap year")

else:

print ("not leap year")

(2) Take two numbers and print the sum of both.

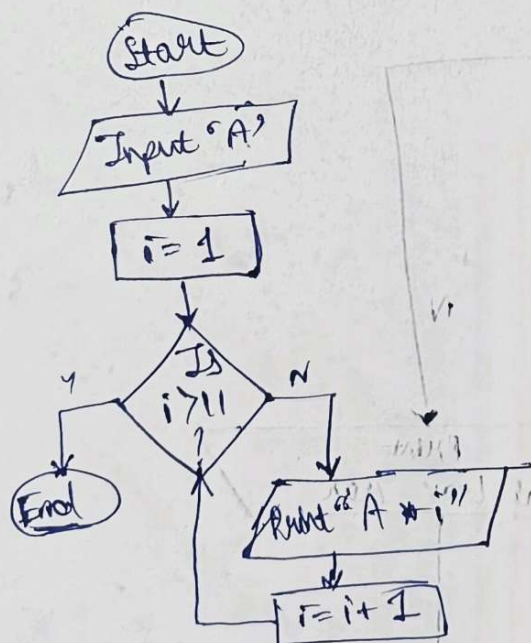

Read a, b

$c = a + b$

print c

(3) Take a number as input and print the multiplication table for it

Read A

Set $i = 1$

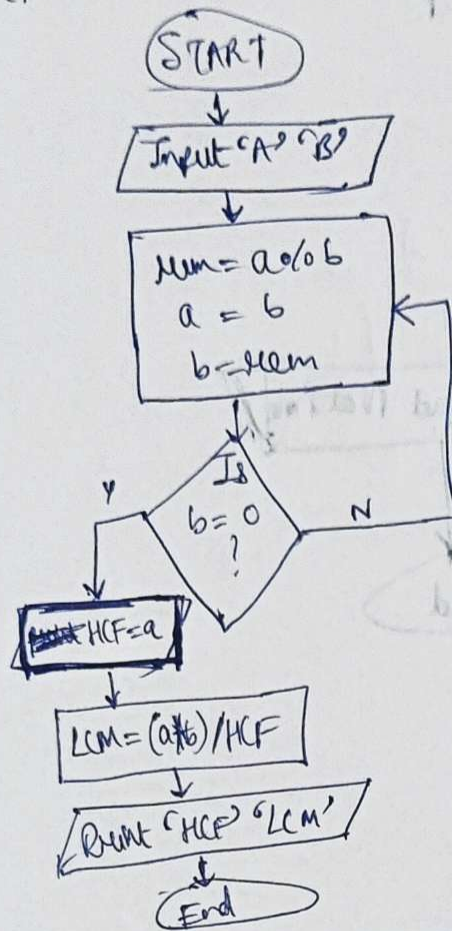

while $i \leq 10$

Print $A * i$

$i++$

End

(4) Take 2 numbers as inputs and find their HCF and LCM:

Read a, b

~~num1 = a~~
num1 = a; num2 = b

while $b \neq 0$:

temp = $a \% b$

a = b

b = temp

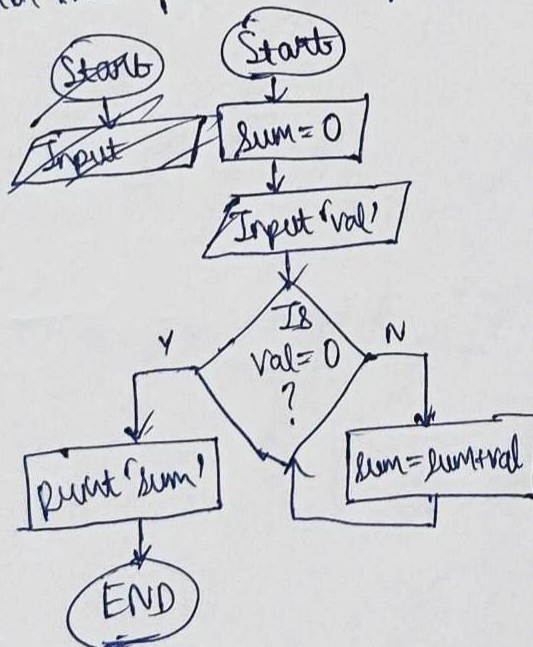

End

hcf = a

$LCM = (num1 * num2) / hcf$

Print hcf, Lcm

(5) Keep taking numbers as inputs till the user enters 'x', after that print sum of all.

Set sum = 0

While True Do

Read Input(val)

if input == 'x' then

Break

Else

sum = sum + (convertToInt(input))

EndWhile

Print Sum
